HACK MATRIX HACKATHON

- PROJECT TITLE : Hidden Gems Local Guide

- TEAM NAME : Team-Cipher

- TEAM MEMBERS : Krishna Barot
  Kunal Yadav
  Nitin Chahar
  Sarthak Dayal

PROBLEM STATEMENT

Popular travel platforms focus mainly on famous tourist destinations.
Lesser-known but beautiful local spots remain undiscovered.
Travelers miss authentic experiences due to lack of local insights.

Who is affected?

- Travelers seeking unique experiences
- Local communities wanting visibility

Why is this important?

- Promotes local tourism
- Reduces overcrowding at popular places
- Supports small/local businesses

EXISTING SOLUTIONS AND GAPS

Existing Solutions:

- Google Maps
- Tripadvisor
- Atlas Obscura

Limitations:

- Focus on popular or commercial places
- Lack of gamification or engagement
- Limited local user contribution
- No incentive for sharing hidden gems

Gap Identified:

- No platform combines local discovery + gamification + interactive map

PROPOSED SOLUTION

We propose a Gamified Travel Discovery App where locals share hidden gems and users explore them interactively.

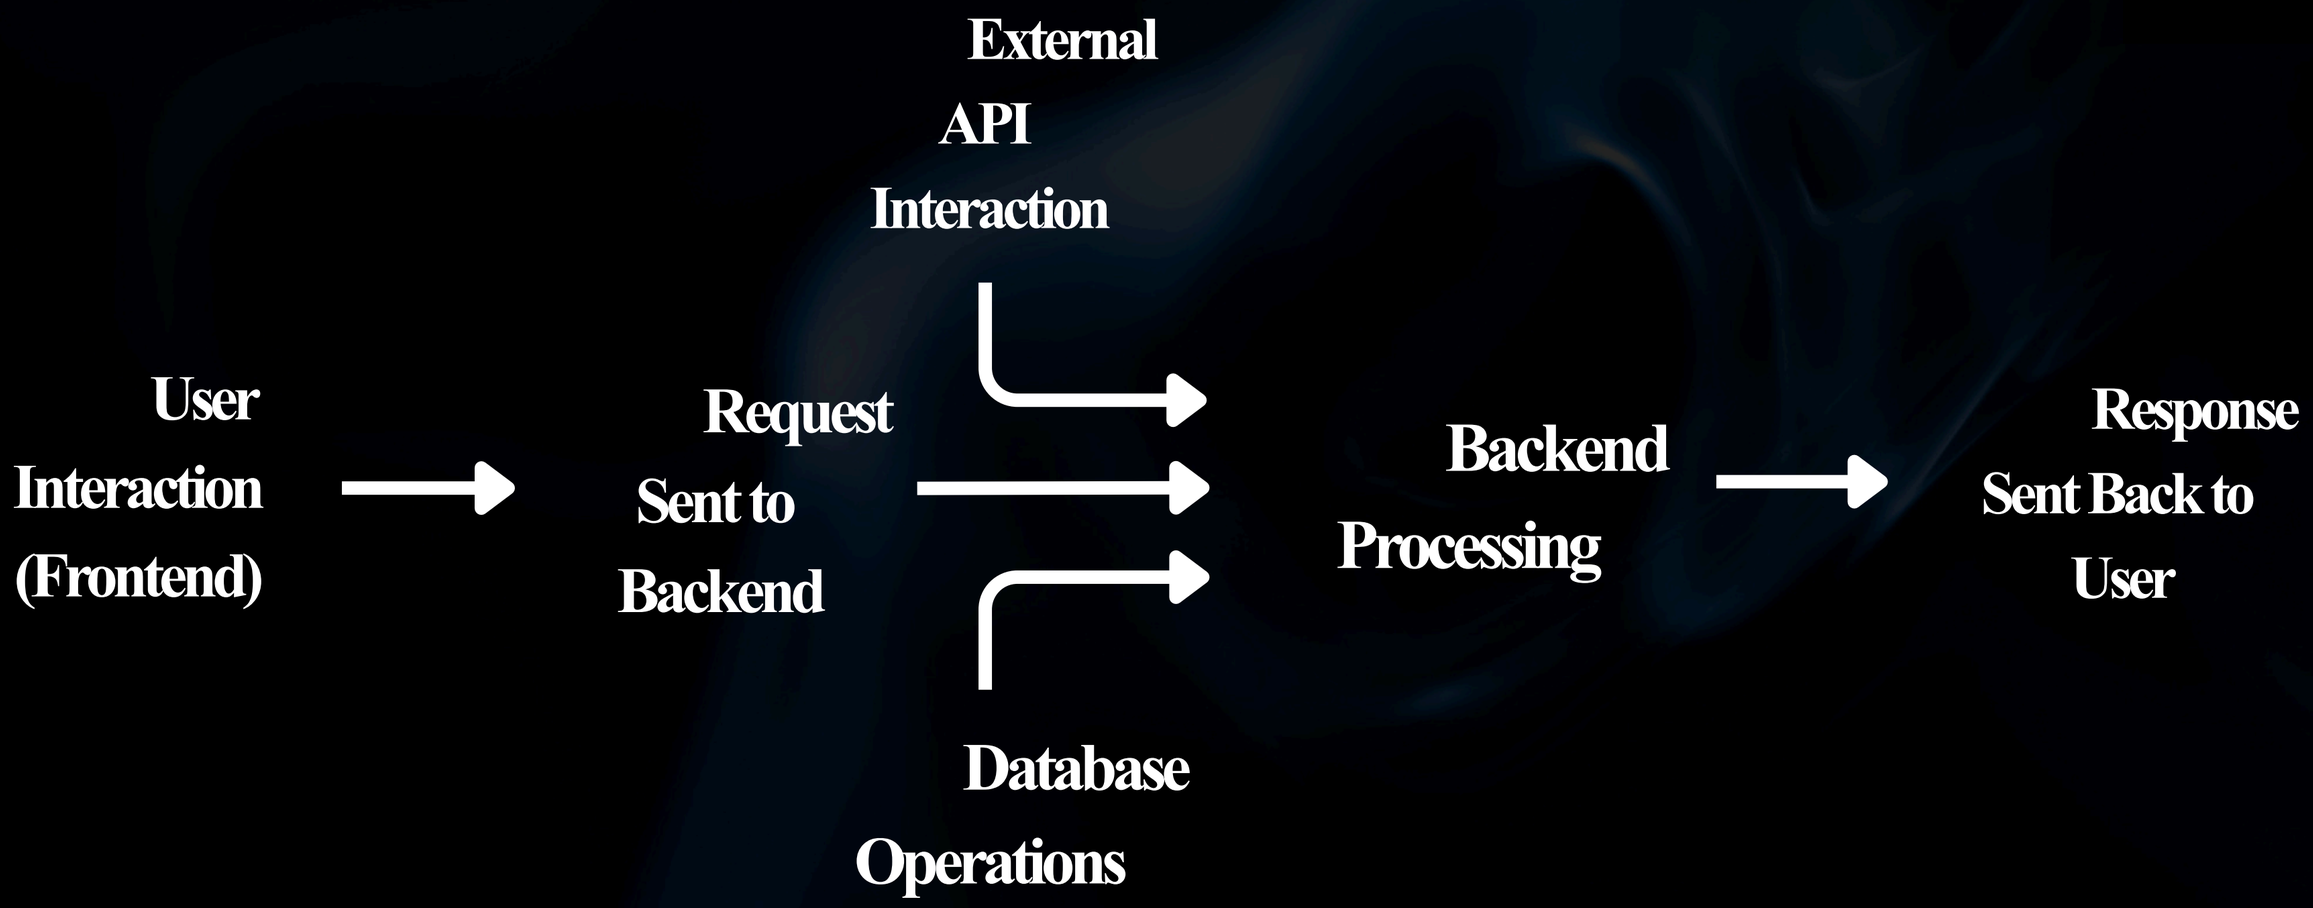
Key Features:

- Interactive map with custom pins
- Gamification system (points, badges, leaderboard)
- Upload photos & descriptions
- Rating & review system
- Filters (nature, food, peaceful, etc.)
-

How it solves the problem:

- Encourages locals to share hidden spots
- Makes exploration fun and engaging
- Helps travelers discover authentic places

SYSTEM ARCHITECTURE



FLOWCHART / WORKING PROCESS

Step-by-step flow:

1. User signs up / logs in
2. Opens interactive map
3. Browses or searches hidden gems
4. Adds a new location (photo + description)
5. Earns points & badges
6. Other users view, like, and rate

Flow:

Start → Login → Explore Map → Add/View Place → Earn Rewards → End

TECH STACK

Frontend:

- React / Flutter → Fast & responsive UI

Backend:

- Node.js / Express → Scalable server

Database:

- Firebase / MongoDB → Real-time data storage

APIs & Tools:

- Google Maps API → Map integration
- Firebase Auth → Secure login
- Cloud Storage → Store images

IMPLEMENTATION PLAN

Step-by-step:

1. Setup project & UI design
2. Integrate map API
3. Build user authentication
4. Create add/view location feature
5. Implement gamification system
6. Testing & deployment

Modules:

- User Module
- Location Module
- Reward System
- Map Integration

EXPECTED OUTCOME / IMPACT

Expected Results:

- A working app with hidden gem discovery
- Active user participation

Benefits:

- Unique travel experiences
- Increased local engagement
- Promotion of unexplored places

Real-world Impact:

- Boosts local tourism economy
- Reduces overcrowding at famous spots

FUTURE SCOPE AND CONCLUSION

Future Improvements:

- AI-based recommendations
- Video/reel-based content
- Personalized travel routes
- Offline mode

Scalability:

- Can expand globally
- Add language support

Conclusion:

- Hidden Gems Explorer transforms travel into a fun, rewarding, and authentic experience by combining community + gamification + exploration.
